MEDIA INFORMATION 2022

# Security Advisor Middle East (SAME)

Today's threat environment continues to evolve and the perpetrators are increasingly sophisticated, which means unprecedented risks to businesses. The growing complexity of networks coupled with the advent of IoT and cloud make it more difficult for IT and security teams to navigate the changing security landscape. CISOs are forced to rethink their defense strategies to deal with this new level of sophistication as well as a change in attack methods. To protect their networks from malicious attacks and manage business risks more strategically, security departments need advanced tools and services. According to the latest forecast from Gartner, global spending on security products and services will reach more than \$124 billion in 2022, making it one of the largest technology sectors.

Since the magazine's launch in 2016, Security Advisor ME (SAME) has become the only source in the Mena that connects security buyers and sellers. We cover the whole spectrum of operational risk management – IT and physical security, governance, business continuity and more – to help our readers cope with their security challenges.

Under its umbrella brand tahawultech.com, Security Advisor ME is backed by a dedicated editorial team with deep knowledge of security issues and access to industry experts. SAME offers high-level information to top security decision-makers through its print, digital and events platforms, creating a community of knowledge and best practices.

## A note about our magazine

SAME has been redesigned for 2022. This decision was made to demonstrate our full-throated support for the enduring strength of this print product. We are doing everything digitally possible to grow our audience on tahawultech.com, on our social media platforms and on our YouTube channel, but we also understand that our magazine's loyal readership and faithful advertisers continue to grow. This redesign is an acknowledgement of their commitment to us.
